

GEO Summit Meeting 2014

improving two-way communication

NASA Goddard · January 31, 2014

Possible talking points:

- How can CPS facilitate better dissemination of information? The Season Plan and other documents often aren't read or widely shared within the field team.
- Does a sufficient venue exist for researchers to express their concerns and suggestions (communication with CPS PMs, outbriefs,...)?
- With many changes on the horizon, what is the best method of communication (website, email distribution, annual GEOSummit meetings,...)?
- www.geosummit.org How can this site be further developed to meet research community needs?

New features:

- Bibliography, updated quarterly
- SCO telecon notes, updated weekly
- Newsletter

FEATURED

GEOSummit 2014

The Greenland Summit's Science Coordination Office invites you to take part in the 2014 GEOSummit meeting, to be held at The Goddard Space Flight Center (GSFC) following the NASA IceBridge and PARCA Meetings.

Right now we do have a room reserved for the GEOSummit workshop to follow on Jan 31st from 8 am to 5 pm Building 33 Room H114. This is a large lecture room (100) people. We also have a small (20) conference room in the building reserved. We should plan to have breakout sessions.

It is our sincere hope that many of you will already be at the PARCA or IceBridge meetings, and will be able to take an extra day to discuss current research and directions for Summit.
